

*Enhancing the performance
of existing glass*

Solar Control Window Films

We have all suffered the effects of glare at work, causing us to squint and strain our eyes. Sureguard Window Films® assist to reduce glare.

Glass is becoming more frequently used as a building material. Architects and Designers aim to achieve the maximum amount of natural light possible by using more glass in new buildings.

Solar Control Window Films are an ideal solution for a cost effective compliance to Workplace Legislation (Health Safety & Welfare) Act 1992, Regulation 7 and Display Screen Regulations, which relates to controlling light and reducing glare, in particular, on computer screens.

Our broad range of Solar Control Window Films reduce both Solar Heat Gain and Glare.

Having Solar Control Window Film installed will assist in controlling and reducing Glare and Heat Gain to make your workplace more comfortable by absorbing and reflecting energy.

Safety Window Films

Does your glass comply with the law?
In the event of an impact, will your glass break safely?

The risk of injury from shattering glass is real and common with the severity of injury being minimal, serious or even fatal.

It is the responsibility of Building Managers; Business Owners; Landlords and Employers to ensure that glass within 'Critical Locations' comply with Regulation 14 of the Workplace (Health Safety & Welfare) Act 1992 which is enforced by the Health & Safety Executive.

Our Safety Window Film offers a retro fit solution to achieve compliance with Regulation 14 of the Workplace (Health Safety and Welfare) Act 1992, to British Standards BS6206, BS6262 and European Standard EN12600.

We offer a range of Clear; Tinted; Reflective and Opaque Safety Window Films, meaning you can achieve a Combination of Safety and Solar Control and/or Privacy using 1 Window Film that, if in the event of an impact, will break safely, minimising injury, contamination and down time.

Energy Efficiency

Advances in energy saving technology means that Window Films can now be an efficient and affordable choice for increasing the energy efficiency of many buildings, contributing to savings in energy used.

Please contact us for further literature and details.

Manifestation

Any full height glass in windows, partitions or doors, must be apparent, made visible to the eye. Manifestation is a cost effective and simple way to making glass apparent, in line with the Disability Discrimination Act (DDA) legislation this could also incorporate advertising and/or branding. We offer a range of standard solutions from frosted dots, squares and stripes, to bespoke digitally printed and machine cut solutions.

With more floor to ceiling glass being used, not just in the workplace but in domestic environments, the Disability Discrimination Act (DDA) states that:

Document M States that: *“People with visual impairment should be in no doubt as to the location of the glass entrance doors, especially when they are within a glazed screen. The choice of a different style of manifestation for the door and the glazed screen can help to differentiate between them. The presence of the door should be apparent not only when it is shut but also when it is open. Where it can be held open, steps should be taken to avoid people being harmed by walking into the door.”*

Security & Bomb Blast Protection Window Films

Unfortunately we are at these times under the constant threat from terrorists, racist and Anti Semitic attack, Sureguard Window Films® offers a range of Security and Bomb Blast Protection Window Films.

In the event of an explosion (chemical or bomb blast) a major cause of injury or death is flying glass. The force of an explosion can propel lethal shards of glass over a large area almost instantly, causing devastating effects on the property and fatal injuries to personnel and passersby.

Security Window Films are available to suit numerous performances and specifications. Many of them combining the very highest performance and latest technologies, to not only protect you in the event of an incident involving glass, but also offer added Solar Heat and Glare Reduction, along with UV reduction.

UV Window Film

Do you need to reduce the amount of UV rays transmitted through your glass to protect:

- Against Fading?
- From Skin Disorders?
- Valuable artefacts?

We offer a Window Film that reduces UV transmittance by 99.9%

Please note, UV Window Film will not eliminate fading, as there are other factors that contribute to the fading.

However, the effect of UV transmittance is dramatically reduced following an installation.

Privacy Window Films

Do you have an area in your property that you are concerned with regards to prying eyes?

Do you have a need to protect occupants', equipment and maybe sensitive information from passers-by?

Offices that are overlooked or are adjacent to pavements and passing pedestrians may have expensive equipment and sensitive information in clear view. We can help create various levels of modesty and privacy by installing one of our 24 Hour or Daylight Hours Privacy Window Films.

The transformation from existing clear glass to frosted glass is quick and easy. The result being; instant privacy; preventing unwanted viewing of restricted; sensitive information and valuable equipment. Our Privacy Window Films are a line of defence, preventing potential opportune thieves from establishing the content of your property through the glass.

Window Graphics

Most business premises have areas of glass which could double as advertising space. From large car showroom windows, to opening times on a shop door, we can combine window graphics, cut and digitally printed in a broad range of (Pantone or RAL) colours to create a standard off the shelf look or a bespoke corporate image.

We offer a broad range of Window Film including 'One Way Window Film' and Cut Graphics.

Our products are MOD Approved and can help reduce your carbon footprint too.

Window graphics can achieve a visually stunning and eye catching look.

We offer frosted and etched vinyl's; full colour images and coloured text. All of which can be used for promoting your business and your corporate brand. Window graphics can give your building's image that finishing touch or a new lease of life that you have been looking for.
