

## LOW E LIGHT NEUTRAL WINDOW FILM

### Low E Light Neutral Window Film

Neutral colour & low reflectivity for minimal change to exterior appearance, thermal insulation Window Films reduces heat gain through glass during warmer months & reduces heat loss in the cooler months, reducing heating & air conditioning costs. Therefore, soon offsetting the initial cost of supply & installation. Not for use on glazing where condensation may occur. 5 year warranty.

#### Benefits

Reduces  
Glare

Reduces  
Heat  
Increase

Reduces Air  
Conditioning  
Costs

Improves  
Working  
Environment

Retains heat,  
lowering  
overheads

Limits Fading of  
Furnishings
