

LOW E NEUTRAL WINDOW FILM

Low E Neutral Window Film

Neutral colour & low reflectivity for minimal change to exterior appearance, thermal insulation Window Films reduces heat gain through glass during warmer months & reduces heat loss in the cooler months, reducing heating & air conditioning costs. Therefore, soon offsetting the initial cost of supply & installation. Internal installation. Not for use on glazing where condensation may occur. 5 year warranty.

Benefits

Reduces Glare

Reduces Heat Increase

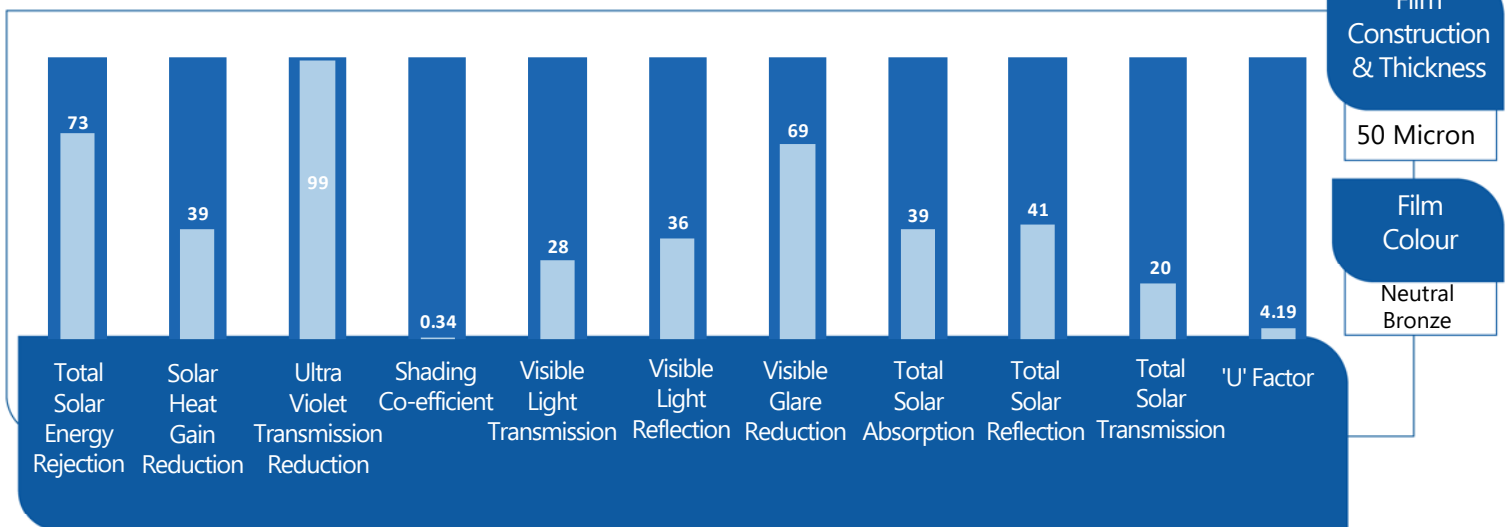

Reduces Air Conditioning Costs

Improves Working Environment

Retains heat, lowering overheads

Limits Fading of Furnishings
